

**Honeycomb** – honey in its original form straight from the beehive – **for your buffet**

# APRICOT

A virgin-pure product that can be consumed in its original form. Virgin honeycomb means that the bees have just made it and filled it with honey. Honey was never extracted from it, and there were no bee brood in it. It is completely naturally produced – bees make it without using comb foundations. Therefore, it is characterized by a virgin-pure white color and purity of beeswax.

Honeycomb can be packaged as:

- Whole honeycomb with wooden frame (app. 3.000 kg)
- 1 box = 6 pcs. x app. 3.000 kg

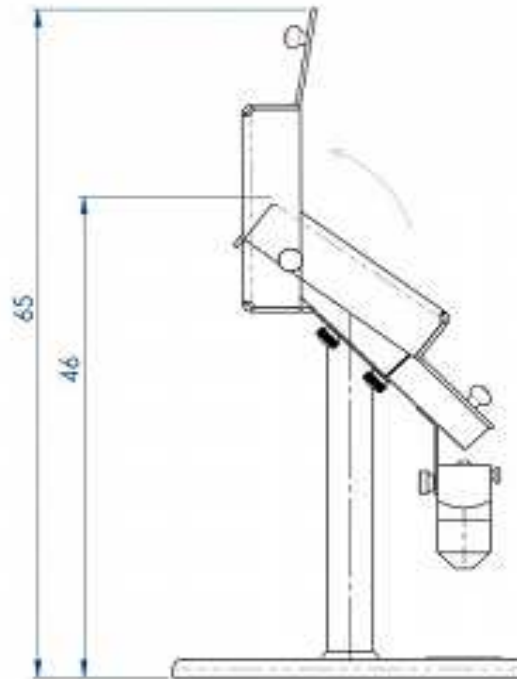

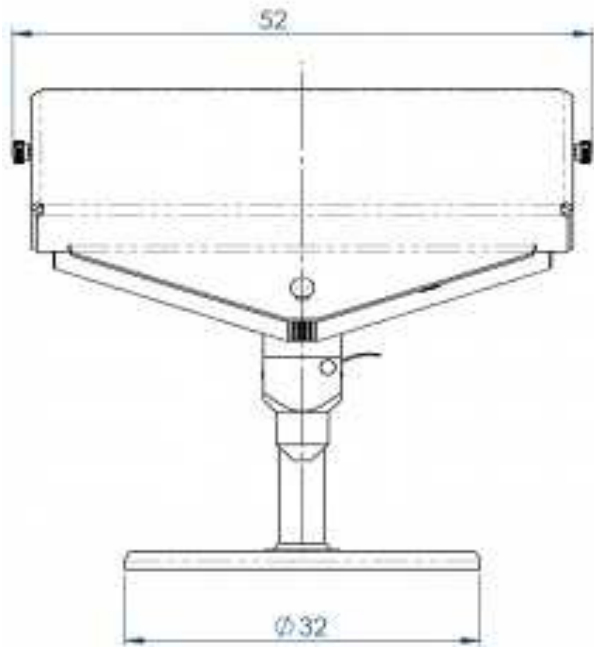

A honeycomb is a mass of hexagonal prismatic wax cells built by honey bees in their nests to store honey and pollen.

Honey can be extracted but when is offered as it is, from the honeycomb, it has received no processing, filtering or manipulation, and provide o mix of hive ingredients as found in nature.

The properties of honey are therefore combined with wax, propolis and pollen.

The comb honey is a super energizing product, in fact contains carbohydrate, proteins, trace elements, enzymes and vitamin K. Following a natural extraction and no pasteurization, it maintain intact its nutritional properties.

item	lenght	width	height
Honeycomb display 3 kg Stainless Steel	45 cm	26 cm	28 cm

item	length	width	height	height with open cover
Honeycomb display 3 kg Stainless Steel + plexiglass cover	52 cm	32 cm	46 cm	65 cm
